

## **Data Reflections**

**Instructions:** Analyzing data leads us to a few different *'tions*: Confirmation – it confirms something we believed to be true but didn't have the evidence to prove, Revelation – it gives us new information we'd never thought about, Inspiration – it generates new ideas for us to use, and Application – it creates space for us to take action. Use the following categories to reflect on the data and develop an action plan for responding to the data.

**Confirmation:** What do you see in the passage that confirms something that you believe?

**Revelation:** What do you see in the passage that is new to you or that you haven't thought of before?

**Inspiration:** Based on the passage/message, what is inspiring you?

**Application:** Based on the passage/message, what is one way you can make this concrete this week?
